Retention and Technology Expertise to Increase Student Success

Improve your retention rate and protect your tuition revenue with Jenzabar Student Success Strategic Consulting.

Delivering an effective student success program that retains your students all the way through to completion has never been more critical to your institution's success. Optimize your institution across every aspect of this important challenge with Jenzabar Student Success Strategic Consulting.

Highly-effective student success programs require a unique combination of skills, resources, and technology to get results. Jenzabar's student success consultants are leaders in the student retention field with extensive experience in higher education student persistence, support, program operation, and technology.

Get the assistance and insight you need to get your new retention program off to a great start or to take your current program to the next level. Reach your goal to help as many students as possible succeed in their educational endeavors with Jenzabar Student Success Strategic Consulting.

Right People, Right Expertise

Jenzabar's strategic consultants have helped colleges and universities of all types improve their retention rates. Whether you're experienced in student support or are considering a new program launch—and whether you use Jenzabar Retention or not—Jenzabar Student Success Strategic Consulting will increase your efficiency and optimize results.

Jenzabar Student Success Strategic Consulting options:

- Student Success Program Assessment
- Institutional Organization for Student Success
- Non-Cognitive Risk Factor Analytics for Student Success
- Student Success Technology Support

Student Success Program Assessment

This is a soup-to-nuts consultation to ramp up the productivity and results of your retention program. An experienced consultant will review and audit your entire student success program, including processes and resources at your institution. Based on your institution's mission and a thorough understanding of the unique attributes of your student population, you will receive a prescriptive report providing detailed data-driven recommendations based on best practices. Your consultant will provide an action plan for

implementation. This assessment benefits student retention programs of all types—whether you are currently using a retention software tool, are considering one, or do not have one in place.

Institutional Organization for Student Success

This holistic service provides guidance to help the institution best organize itself to maximize student success. We will examine and refine the process for reaching out to students in need of intervention. Your consultant will provide recommendations for staff involvement, as well as roles, approaches, workflows, and reporting to ensure that there is a clear plan of action to reach out to and retain students who are identified to be “at risk.” The institution-wide implementation plan identifies opportunities for efficiency improvements, data collection, and analysis strategies.

Non-Cognitive Risk Factor Analytics for Student Success

Including non-cognitive risk factors in your retention model can collectively increase the accuracy of your performance and persistence predictions by as much as 30 to 40%. A Jenzabar strategic consultant will help you deploy the Jenzabar Student Success Survey to uncover the previously-hidden factors that have a significant impact on retention at your institution. Your consultant will help create or augment your existing early alert systems to identify at-risk students and then connect them to the precise support services and activities they need to increase persistence and academic success.

Student Success Technology Support

Jenzabar Student Success Strategic Consulting provides many options to assist you in maximizing your student success efforts leveraging Jenzabar Retention:

- Usage assessment including consulting and advice on how to increase and optimize usage on your campus to create widespread institutional buy-in.
- Creation of custom data metrics that may be included in your predictive model, to be available on the student information screens or to segment your student population for communication and intervention. Each campus has its own crucial bits of information that are essential for understanding the student success puzzle. Adding custom data metrics guarantees a fuller and richer understanding of student success.
- Creation of custom reports to help you meet your most important assessment needs, to highlight the effectiveness of your program and understand needed improvement efforts.
- Creation of additional predictive models to extend proactive interventions beyond the population cohort modeled during your Jenzabar Retention implementation.

Jenzabar student information systems have been chosen more often than any other SIS over the past five years. Exclusively serving higher education, Jenzabar software and services are designed to drive higher performance in every department at your institution. Jenzabar collaborates with clients to make higher education amazing.
